			ART UNIT 2143	PAPER NUMBER
			MAIL DATE 06/19/2007	DELIVERY MODE PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/757,435	<b>Applicant(s)</b> HURTTA ET AL.	
	<b>Examiner</b> Kyung H. Shin	<b>Art Unit</b> 2143	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 15 January 2004.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1-24 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-24 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 15 January 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### DETAILED ACTION

1. This action is responding to application filed on **1-15-2004 with priority date of 2-21-2003**.
2. Claims **1 - 24** are pending. Claims **1, 13** are independent.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim **1 - 24** are rejected under 35 U.S.C. 102(e) as being anticipated by **Widegren et al.** (US PG PUB No. **20020036983**).

**Regarding Claim 1**, Widegren discloses a method for establishing sessions in a network comprising a user entity, a network control node and a plurality of network nodes storing subscriber specific information, the method comprising the steps of

- a) receiving a session establishing request at the network control node, (see Widegren paragraph [0082], lines 2-6; paragraph [0083], lines 7-10; paragraph

- [0097], lines 9-13: request for session initiation; paragraph [0055], lines 1-6: multiple nodes with subscription information)
- b) forwarding a policy request message from the network control node to each network node of the plurality of network nodes storing subscriber specific information which comprise policy information required for the session to be established, (see Widegren paragraph [0089], lines 1-8; paragraph [0130], lines 1-5: forward policy request)
  - c) processing the policy request message to generate a policy decision message and sending the policy decision message to the network control node from each of the network nodes having received the policy request message, (see Widegren paragraph [0131], lines 1-6; paragraph [0128], lines 5-12; paragraph [0130], lines 3-5: generate policy decision for each node, each node accessed for policy type information (resource availability))
  - d) generating a single policy decision confirmation message based on the received policy decision messages in the network control node, (see Widegren paragraph [0131], lines 1-6: generate single policy decision) and
  - e) sending the single policy decision message to the user entity. (see Widegren paragraph [0132], lines 1-6; paragraph [0101], lines 1-5: send policy decision, accepted or rejected)

**Regarding Claims 2, 14**, Widegren discloses the method, system according to claims 1, 13, wherein the network control element is itself a network node of the plurality of

Art Unit: 2143

network nodes storing subscriber specific information. (see Widegren paragraph [0055], lines 1-6; paragraph [0087], lines 1-3: GGSN, control network resources (network control element), storage subscriber information)

**Regarding Claims 3, 15**, Widegren discloses the method, system according to claims 1, 13, wherein the network control element is a network service element serving the user entity. (see Widegren paragraph [0055], lines 1-6; paragraph [0087], lines 1-3: control network resources (network control element), interface to General Packet Radio System (GPRS), serving user entity network node)

**Regarding Claims 4, 16**, Widegren discloses the method, system according to claims 2, 14, further comprising the step of selecting the network control element being a network node storing subscriber specific information by a network connection serving element (GGSN) serving the user entity. (see Widegren paragraph [0026], lines 1-3; paragraph [0055], lines 1-6: GGSN network node implemented, interface between different networks (gateway))

**Regarding Claims 5, 17**, Widegren discloses the method, system according to claims 4, 13, wherein in the selecting step, a default network node storing subscriber specific information is selected. (see Widegren paragraph [0055], lines 4-6; paragraph [0058], lines 5-8: default parameters, default storage of subscriber information)

Art Unit: 2143

**Regarding Claims 6, 18,** Widegren discloses the method, system according to claims 1, 13, wherein the single policy decision message comprises an authorization token from each node storing subscriber specific information. (see Widegren paragraph [0155], lines 1-5; paragraph [0132], lines 1-6: authorization token, "session thru" information, communications session initiated)

**Regarding Claims 7, 19,** Widegren discloses the method, system according to claims 1, 13, wherein the user entity is located in a visited operator domain, and the method further comprising the steps of:

- a) inserting policy information into a session set-up protocol message, (see Widegren paragraph [0132], lines 1-6; paragraph [0137], lines 1-4; paragraph [0143], lines 1-4: SIP, session initiation protocol, policy information utilized)
- b) sending the session set-up protocol message to a network control element in the home domain of the user entity, (see Widegren paragraph [0055], lines 1-6; paragraph [0087], lines 1-3: GGSN, control network resources (network control element))
- c) forwarding the policy information to a home subscriber database node, (see Widegren paragraph [0089], lines 1-8; paragraph [0130], lines 1-5: forward policy request)
- d) extracting an address of a home node storing subscriber specific information of the user entity from the subscriber database node, (see Widegren paragraph

Art Unit: 2143

[0126], lines 9-12; paragraph [0143], lines 1-4: SIP utilizes IP address as endpoint indications, policy information)

- e) creating home policy information based on the extracted address, (see Widegren paragraph [0130], lines 1-5: usage (policy) information determined) and
- f) forwarding the home policy information to a network control element of the visited network. (see Widegren paragraph [0089], lines 1-8; paragraph [0130], lines 1-5: forward policy request)

**Regarding Claims 8, 20,** Widegren discloses the method, system according to claims 7, 19, wherein the policy information comprises an authentication token, and the home policy information created in the creating step comprises a home Authentication Token. (see Widegren paragraph [0155], lines 1-5; paragraph [0132], lines 1-6: authorization token, session thru information utilized to initiate communications session)

**Regarding Claims 9, 21,** Widegren discloses the method, system according to claims 7, 19, further comprising the step of: creating a visited policy information in the network control element of the visited network. (see Widegren paragraph [0087], lines 1-4; paragraph [0130], lines 1-5: GGSN interface between networks (visited, home); paragraph [0128], lines 5-12: policy information processed)

**Regarding Claims 10, 22,** Widegren discloses the method, system according to claims 7, 19, wherein in the forwarding step, the home policy information is inserted into

Art Unit: 2143

another session set-up protocol message. (see Widegren paragraph [0131], lines 3-8; paragraph [0137], lines 1-4; paragraph [0143], lines 1-4: policy information, SIP, session initiation protocol)

**Regarding Claims 11, 23**, Widegren discloses the method, system according to claims 7, 19, wherein the session set-up protocol is a Session Initiation Protocol (SIP). (see Widegren paragraph [0131], lines 3-8; paragraph [0137], lines 1-4; paragraph [0143], lines 1-4: SIP, session initiation protocol)

**Regarding Claims 12, 24**, Widegren discloses the method, system according to claims 1, 13, wherein the network node storing subscriber specific information is a Policy Control Function (PCF). (see Widegren paragraph [0087], lines 3-6; paragraph [0096], line 7-8: GGSN, Decision Point (DP) (or policy server) can be inside or outside GGSN, DP is a policy control function (PCF) node)

**Regarding Claim 13**, Widegren discloses a system for establishing sessions in a network comprising:

- a) a user entity; (see Widegren paragraph [0097], lines 9-13: user entity)
  - b) a network control node; (see Widegren paragraph [0055], lines 1-6; paragraph [0087], lines 1-3: GGSN, control network resources (network control element))
- and

- c) a plurality of network nodes storing subscriber specific information, (see Widegren paragraph [0055], lines 1-6: multiple nodes with subscription information)
- d) wherein the network control node comprises means for receiving a session establishing request, and for forwarding a policy request message to each network node of the plurality of network nodes storing subscriber specific information comprising policy information required for the session to be established, (see Widegren paragraph [0082], lines 2-6; paragraph [0083], lines 7-10; paragraph [0097], lines 9-13: session request; paragraph [0089], lines 1-8; paragraph [0130], lines 1-5: forward policy request)
- e) the nodes storing subscriber specific information comprise means for processing the policy request message to generate a policy decision message and for sending the policy decision message to the network control node, (see Widegren paragraph [0131], lines 1-6; paragraph [0128], lines 5-12; paragraph [0130], lines 3-5: generate a policy decision for each node) and
- f) the network control node comprises means for generating a single policy decision confirmation message based on the received policy decision messages, and for sending the single policy decision message to the user entity. (see Widegren paragraph [0131], lines 1-6; paragraph [0128], lines 5-12: generate a policy decision for each node; paragraph [0132], lines 1-6; paragraph [0101], lines 1-5: send policy decision, accepted or rejected)

**Conclusion**

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kyung H. Shin whose telephone number is (571) 272-3920. The examiner can normally be reached on 9:30 am - 6 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A. Wiley can be reached on (571) 272-3923. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
